

SUMMER 2018

Staff News : As many patients will know , Dr McCoy has now retired. In May Dr Nicki Pointing left as she and her husband moved to Kapiti.

We are excited to announce that we have recruited Dr Tricia Briscoe a very experienced GP moving down from Rotorua. She will start on Thursday 10 January and will be available to many of Dr McCoy's patients. She will be working Wednesday to Friday.

Some patients will have met Dr Eli Botella Ruiz who is in the process of transitioning to Wellington from Christchurch . She is working Monday and Tuesdays until 11 February when she will work Monday to Thursday. She will be available for some of Dr McCoys patients who have already seen her and Dr Pointing's patients.

As we have worked through the recruitment process, we thank everyone for their patience and apologise for the uncertainty this has caused over the last few months.

Headlines:

Government brings in reduced fees for Community Service card holders and their dependents. ACC has also increased their co-payment for Community Service card holders . Please see posters or our website for full details.

Our Health Care Home programme has started with GP telephone triage. We will also be offering free extended nurse appointments for patients with complex health needs under the Year of Care programme.

Frequently asked questions? (From the Practice Manager)

1. Why does it cost more for a faxed prescription? The rules around prescribing medications mean a signed copy of the prescription must go to the pharmacy so when a prescription is faxed the original is also posted hence the extra costs involved.
2. I thought ACC was free—why do you charge \$52 to see a GP when it's an ACC consult? ACC gives us a little bit of money towards the cost of the consultation but this is only about 30% of our fee and the normal govt subsidy doesn't apply.
3. What is "LTC"—long term conditions—the CCDHB provides us with a little money to help those with more than one long term health condition stay well and avoid hospital. The money is used to help with a free or partially funded annual review and if we need to see you more regularly than you can afford then we may be able to use this money to help you.
4. Why did I get charged \$5 extra? This is the Admin fee. In 2016 we stopped charging \$3's extra if you didn't pay on the day, giving patients the option to use internet banking. However if patients don't pay within 10 working days, a \$5 admin fee is added at the end of the month when the statements are printed and sent out. As this is an automated process, if you believe this fee was unfairly applied please call us.
5. Do you have Cancellation charges? We have recently updated our fees document to include our charges such as DNAs (did not attend) —please see the link on our website.
6. Why didn't I get an invoice in the mail for my repeat script.? In order to provide a better service we now text those with a mobile phone to let them know the script is ready and included is the cost and payment details. If you do not have a mobile ph and are not collecting your script we will send you an invoice. Please phone reception if you need an invoice.
7. For internet banking can I use the account 030558 0166886 00—ending 26 or 00 ? Yes either is fine. The 00 account will be updated to your account at least weekly—the 26 is paid off at least twice weekly.
8. Can you call or text us when our GP is running late? We are happy for patients to phone in and check their GPs schedule. It becomes very complex if we try to start contacting patients as sometimes a GP appears to be running late and then they catch up really quickly, or a previous patient doesn't turn up. If there is a major change we will text or call you.
9. **Manage my health (patient portal or MMH) -**
 - MMH is not available for anything urgent—please call the practice if you need a quick response
 - I have registered but can't access the portal what do I do? You may have not yet activated your registration—if you have misplaced your activation code please call reception.
 - Why can't I see my consultation notes.? We hope to have this facility available in the future and will let you know when it is available.
 - Why do I get an email telling me my prescription is ready and then I call in to the practice and it isn't ready? As soon as the nurse or GP prints your script MMH sends you a message saying it is processed however there are 2-3 more steps to go before it is ready e.g. getting it signed and invoiced so please remember the 48hr rule still applies. Urgent scripts cannot be ordered via MMH.
 - The nurse said my results are in but I can't see them—why? There can be a delay in transmission of results via the server so please re-log in again after a few hours.
 - I am having some trouble with MMH —what can I do? At the bottom of the Managemyhealth home page is a technical support tab—please click on this and you can email MMH directly for technical advice. We have recently received a guide we can email you—email reception for a copy.
